Chronoscopic Education charitable incorporated organisation

FOR INFORMATION ABOUT OUR OUR AIMS AND OUR PROJECTS

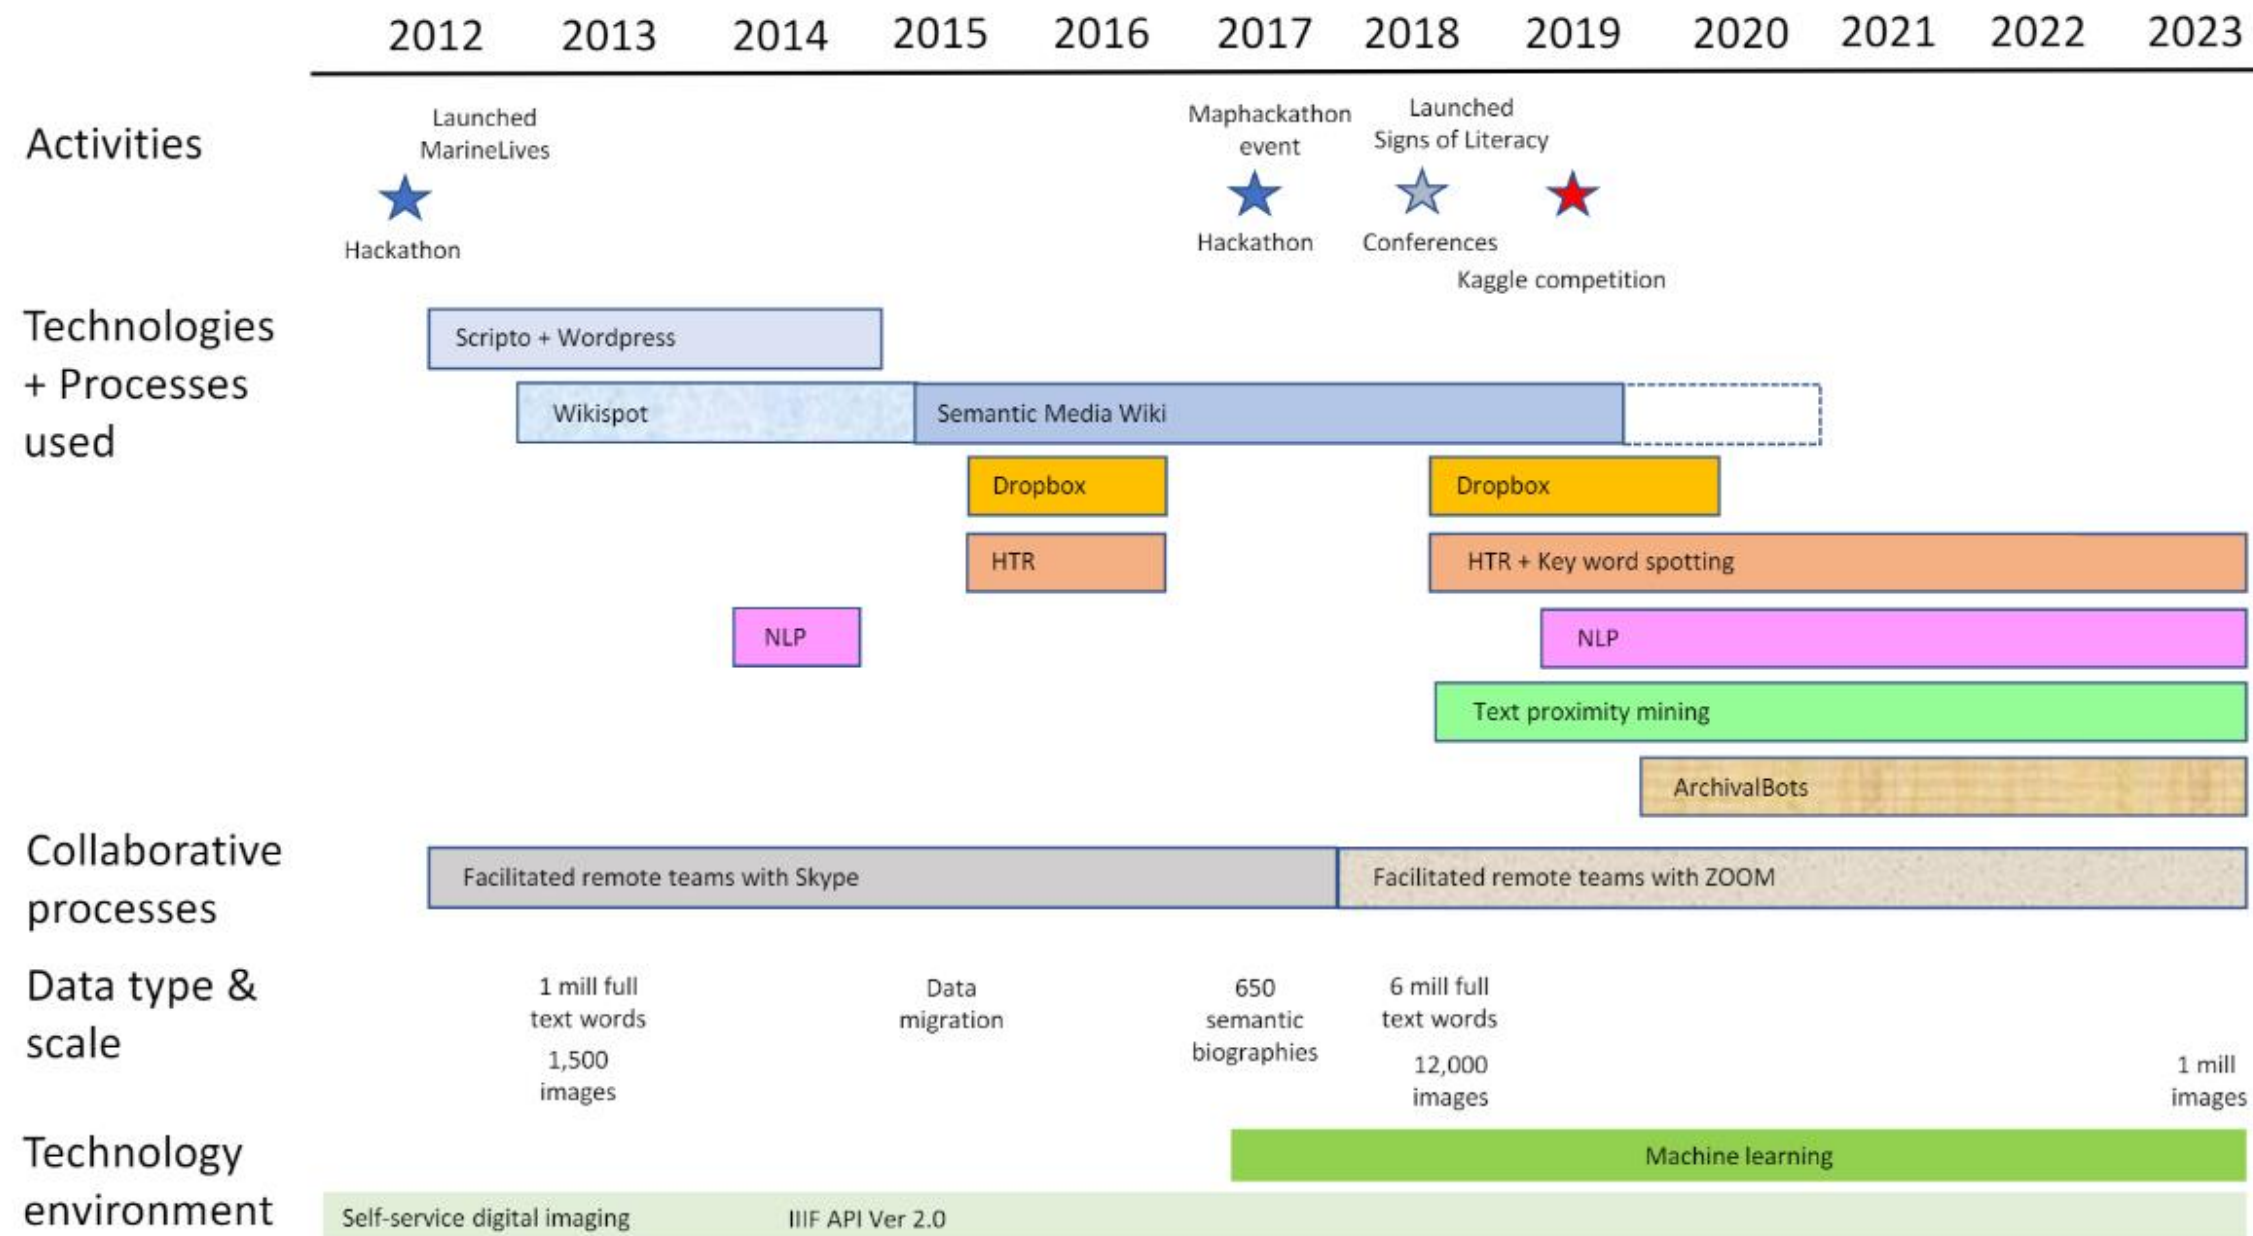

We are registering a charitable incorporated organisation under the name of Chronoscopic Education, to be the legal, funding and technology home for MarineLives, our sister project Maphackathon, and our new community, Signs of Literacy.

The aims of Chronoscopic Education are threefold:

- (1) To further the teaching of palaeographic, digital research and project management skills, at universities and schools.
- (2) To apply insights from small teams in management consultancy and R&D project management, together with tools from data science, to the subject matter of history.
- (3) To build a virtual manuscript-based archive and associated research community, which will foster a culture of collaborative scholarship.

MarineLives & its progeny: changing technology and processes

Thanks to our one hundred and ninety-six contributors since 2012

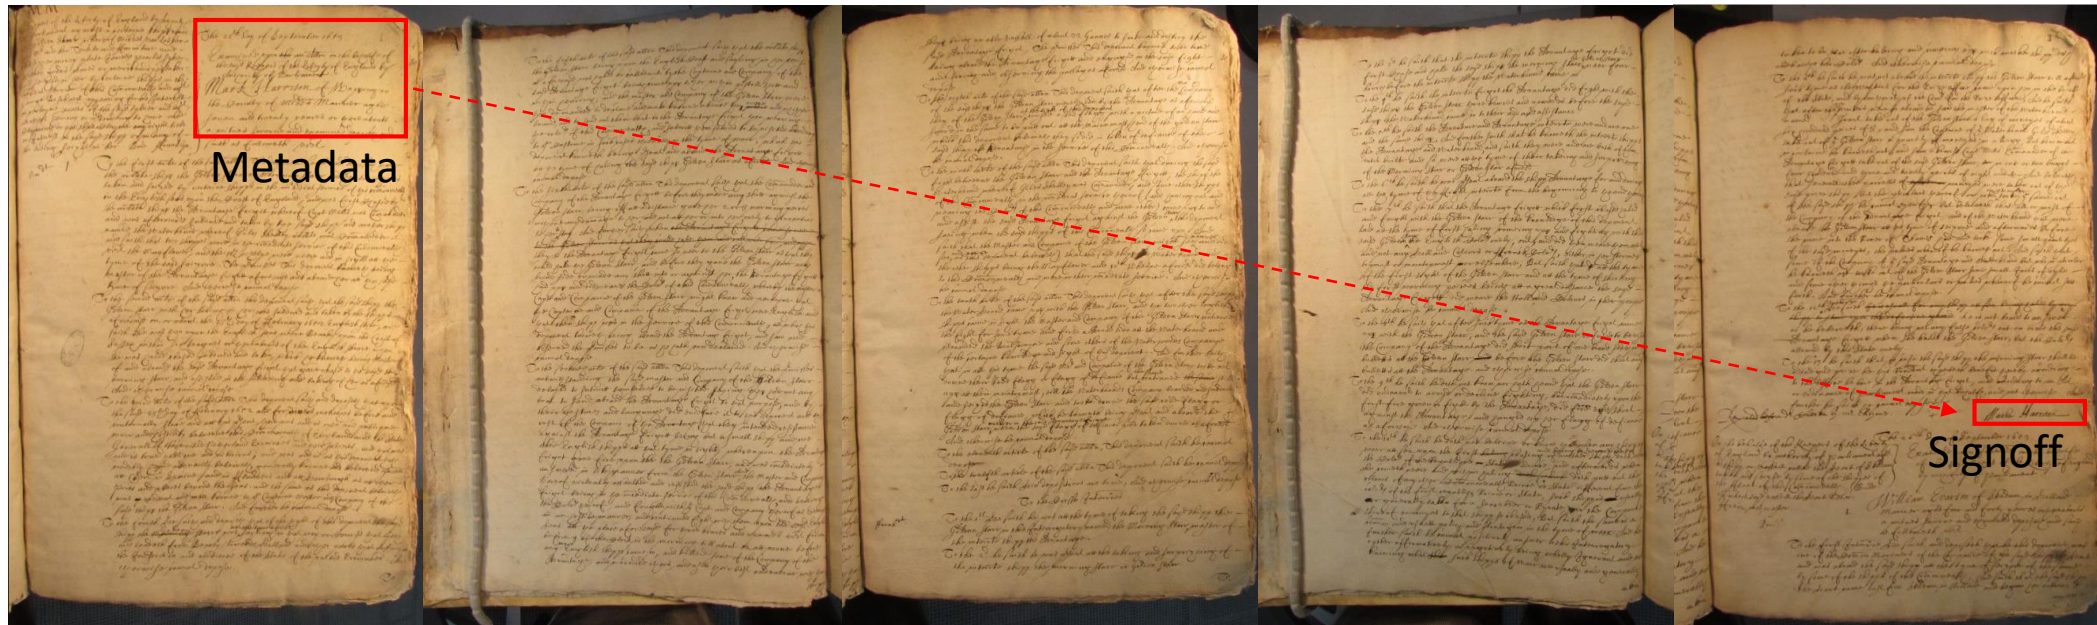

We would like to recognise and thank our friends and supporters who have contributed to the MarineLives project, to the Maphackathon event, to the Early Modern Textiles, Garments and Dyestuffs glossary, and to the Signs of Literacy initiative, whether as volunteer transcribers, annotators, commentators, glossary contributors, software developers, advisors, interviewees, workshop participants, workshop and conference speakers, or as PhD Forum participants (in alphabetical order)

7 Englishman of warr lying in or neere the downes for the defense and
8 service of this Commonwealth./
9 To the 6:th hee saith, That the said two french men of warr never deserted
10 the pursuite of the said shipp ffortune, till shée was by the English
11 frigatts Companie seized as aforesaid, which was about a League from
12 the English coast according to this depo^s judgement, but not within
13 the Command of any such fort Castle or shipp as is interrare./
14 Pier. 4 Rouse

Transkribus recognition engine has been trained on Admiralty Court records

MarineLives experience of Transkribus

- Interface not easy for occasional volunteer users
- User interface challenges can be overcome with good facilitated training and supervision
- In the real world, a volunteer always has the choice of transcribing a page from scratch, for editing by a facilitator, or using Transkribus to generate a first pass, for revision by the volunteer and subsequent editing by the facilitator
- Facilitators go straight to the underlying digital image, not to the raw Transkribus data, and only rarely use statistical predictions by Transkribus of the likelihood of a specific letter or word

MarineLives thoughts on Transkribus

- Working with palaeographically trained volunteers
 - Use of Transkribus needs to be carefully built into volunteer and facilitator work processes
 - MarineLives volunteers need to be recruited and trained differently if using Transkribus
 - Use of Transkribus makes sense if volunteer transcribe is going to do twenty manuscript pages or more (= 10-15 hours work)
- Working with high volume volunteers (public historians, doctoral students)
 - Greater interest in technical support and readiness to learn system
 - But, temptation to transcribe from scratch as own technical competence builds up

MarineLives ideas for Transkribus

- Look at the culture, governance and data structures of other large scale image oriented initiatives, e.g. IIF; Pelagios/Recogito
- Actively share kernels and algorithms for reuse, e.g. Kaggle
- Publish timely public statistics for Transkribus data universe (manuscripts by period, by writing style, closed vs open corpora, error rates by HTR engine for different corpora...)
- Provide guidance on planned future development resource & development priorities beyond 2019
- Encourage development of facilitated user groups by period and/or handwriting type
- Address interface issues, e.g. labelling of text areas by category; naming or numbering of pages to enhance human discoverability

MarineLives plans using Transkribus in 2019 & beyond

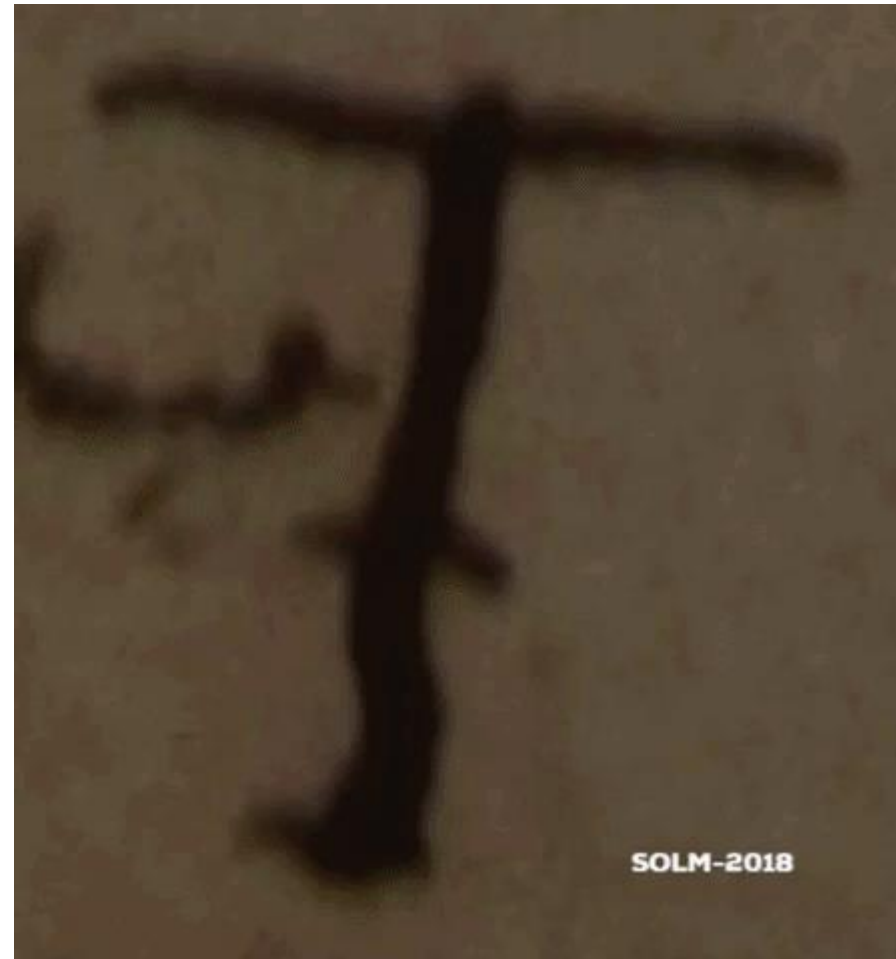

- Increase size of ground base to 6 million words and explore impact on accuracy of full text transcription [part of Signs of Literacy initiative]
- Investigate key word spotting for untranscribed pages as a tool to improve search [part of Signs of Literacy initiative]
- Explore the interface being created by the Stadsarchief Amsterdam with their digitisation partner Picturae

Signs of literacy initiative

Pattern seeking

How many different letters can you recognise?

31 images of initials in the SOLM-2018 database
Animated GIF viewable only in Powerpoint

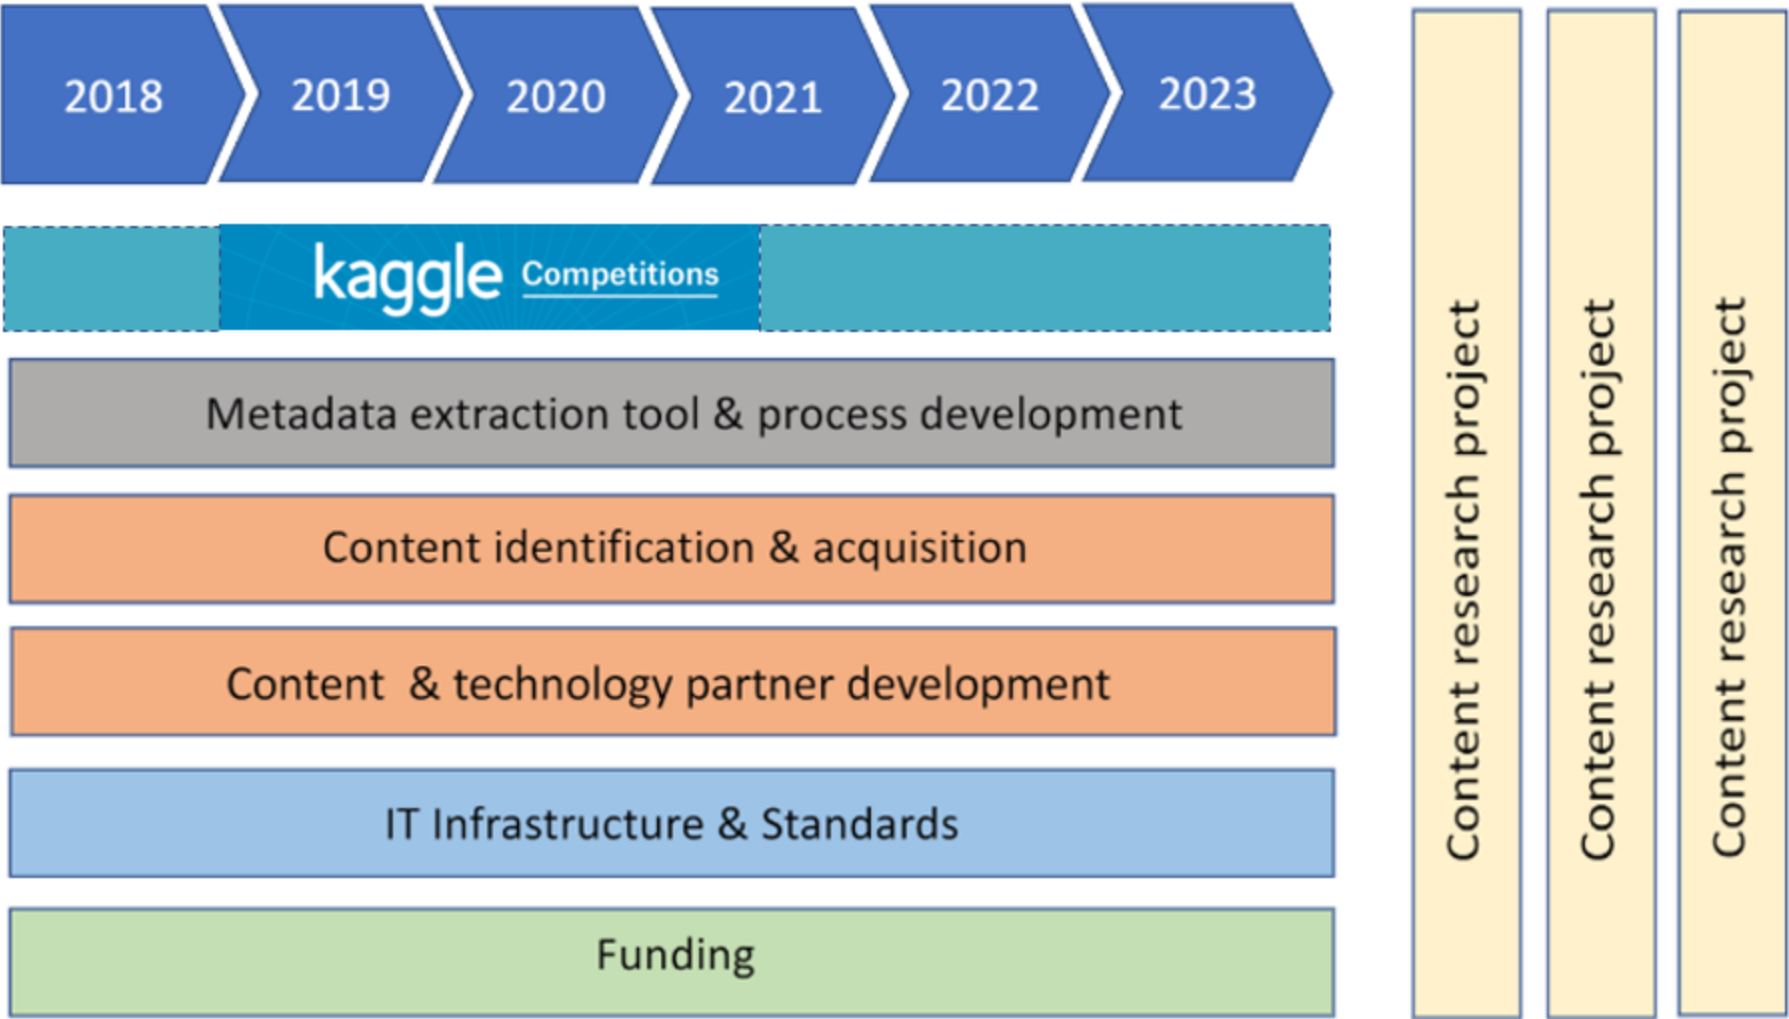

Initials – Ts and Js, and a few others thrown in

Signs of Literacy initiative objectives

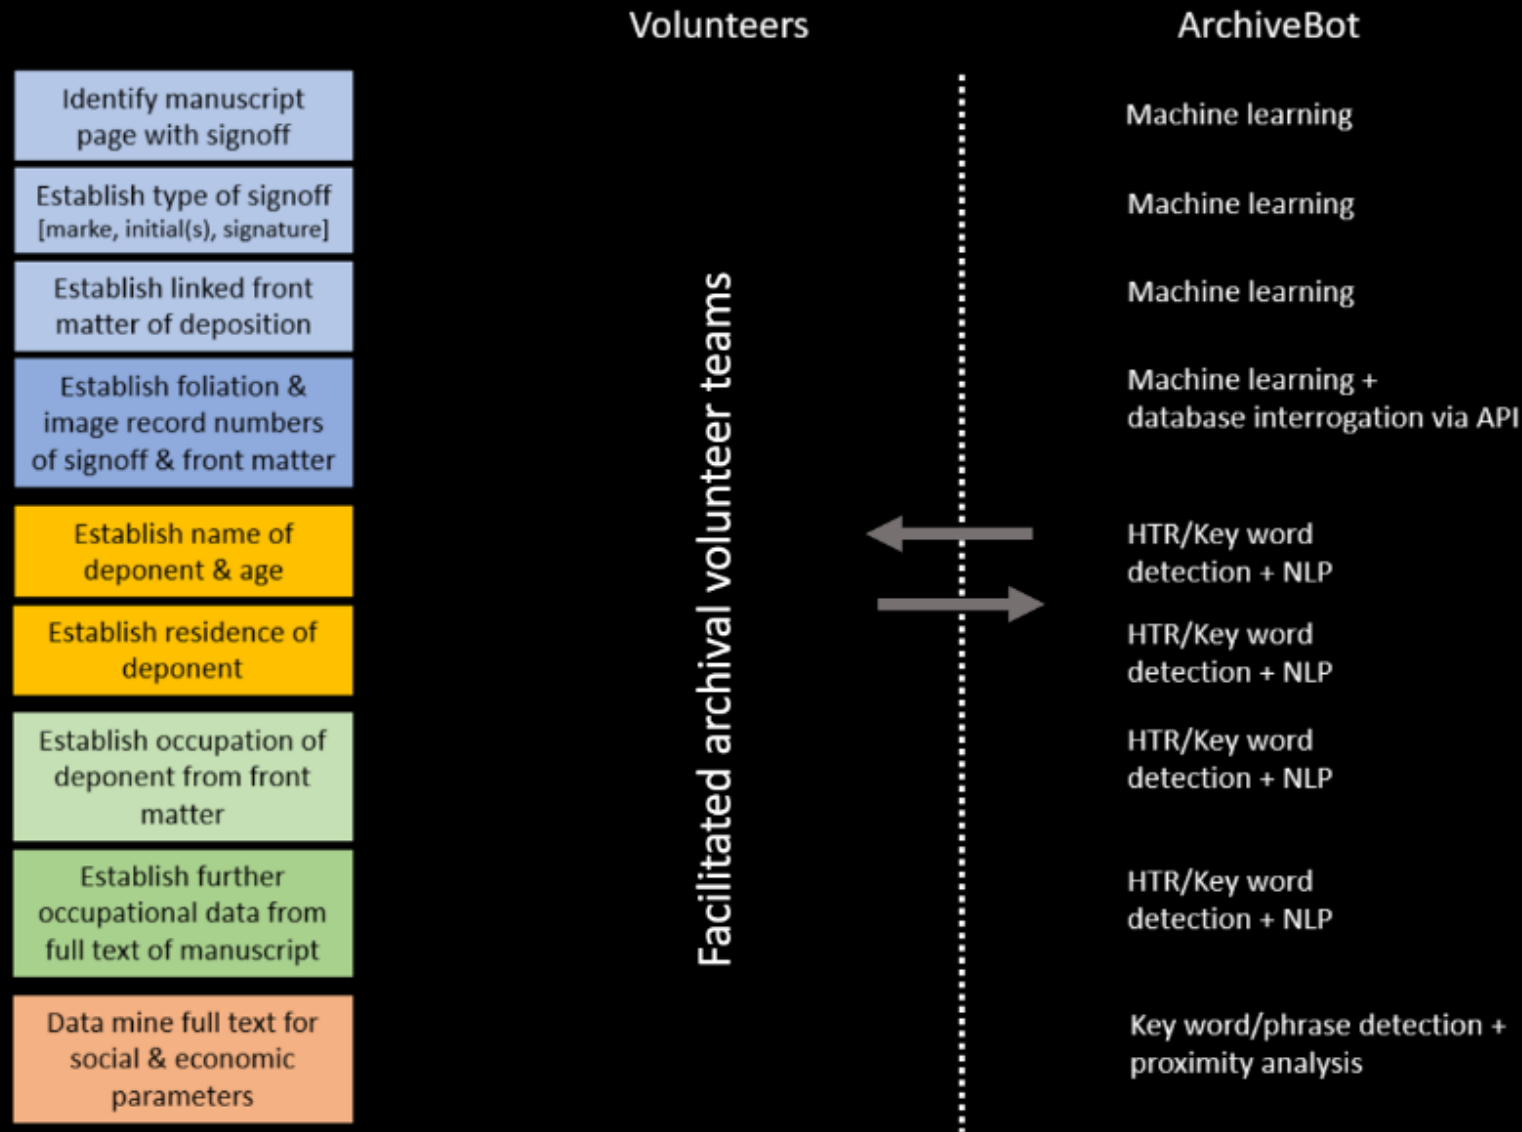

- Develop tools and processes for increasingly automated metadata extraction and linkage from digitised handwritten manuscript pages
- Develop the infrastructure to deliver a highly scaleable data set of one million manuscript pages containing signoffs and front matter
- Stimulate the development of machine learning capability in multiple archival centres of excellence
- Build interest amongst historians and linguists in machine learning applications to support close reading and distant reading approaches to large scale data sets
- Answer important research questions in field of historical literacy

Proposed structure of Signs of Literacy initiative workstreams

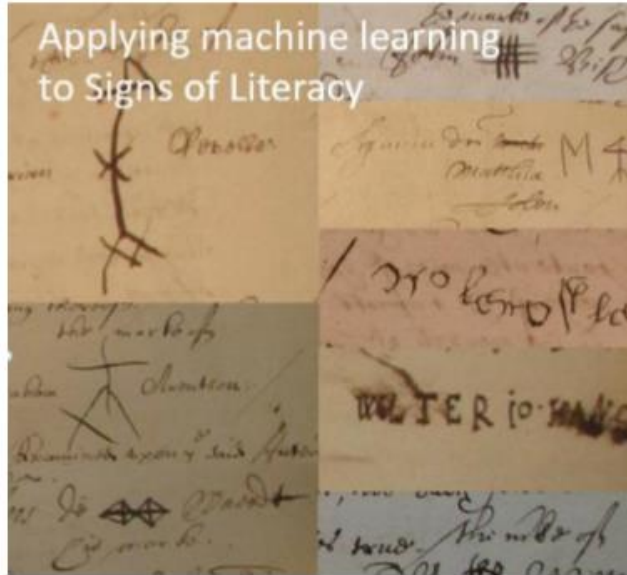

Collective intelligence

Help us
build a bot

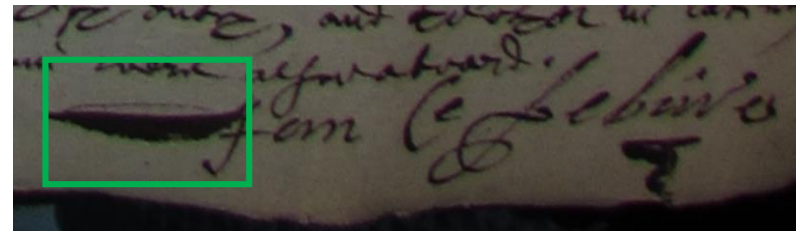

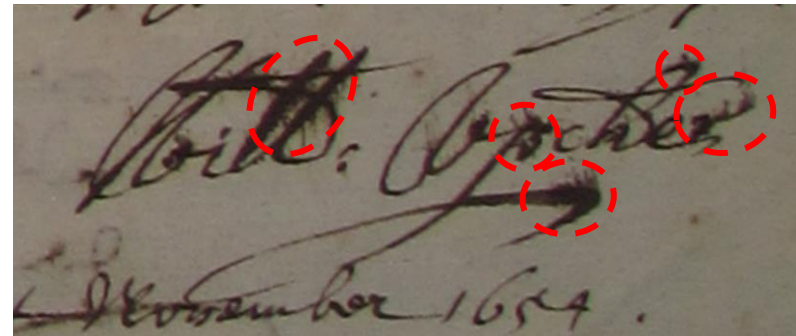

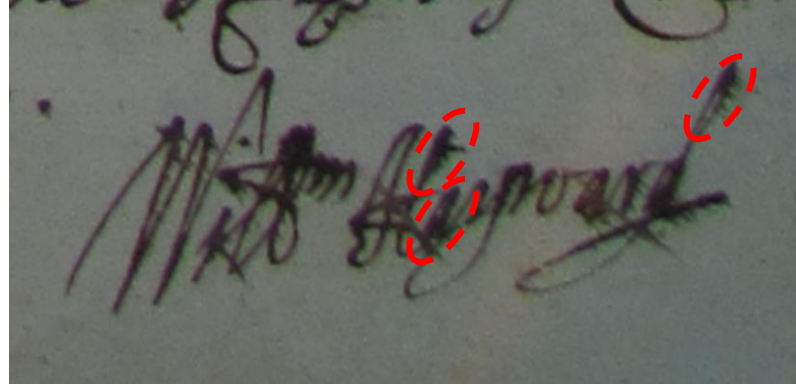

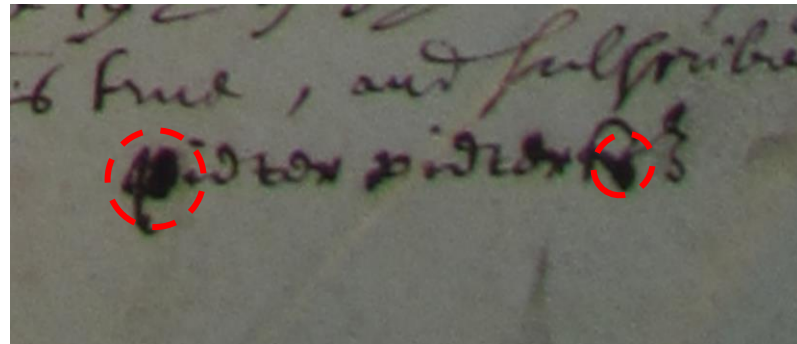

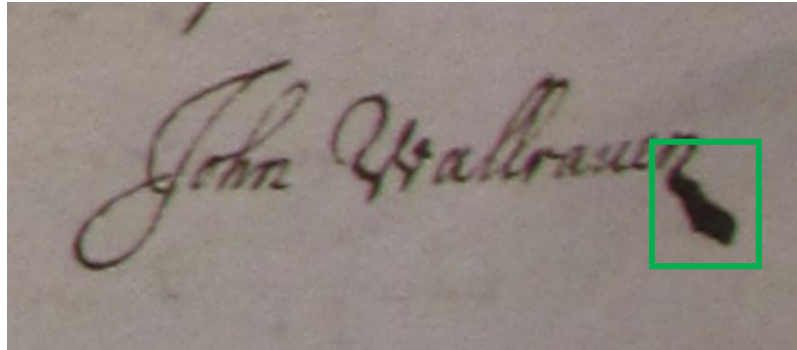

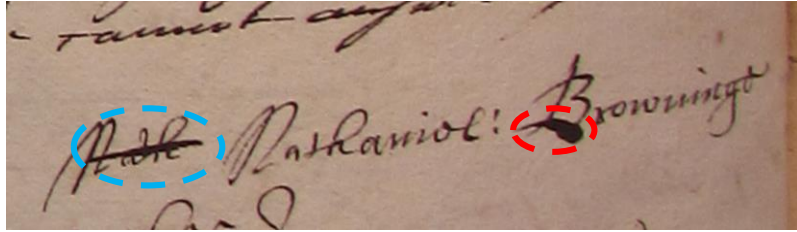

We are exploring a range of potential technical partners

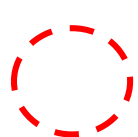

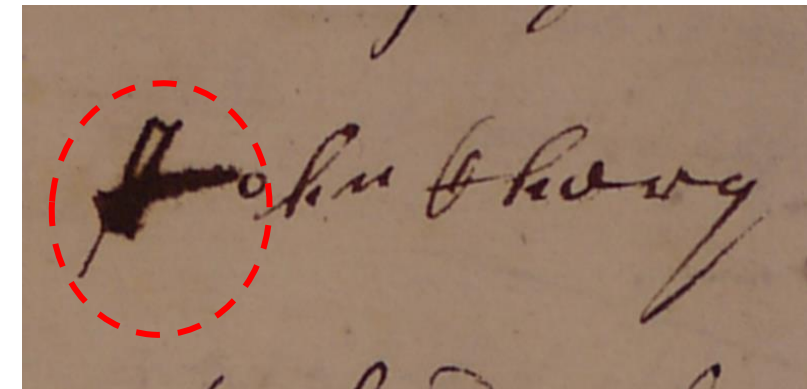

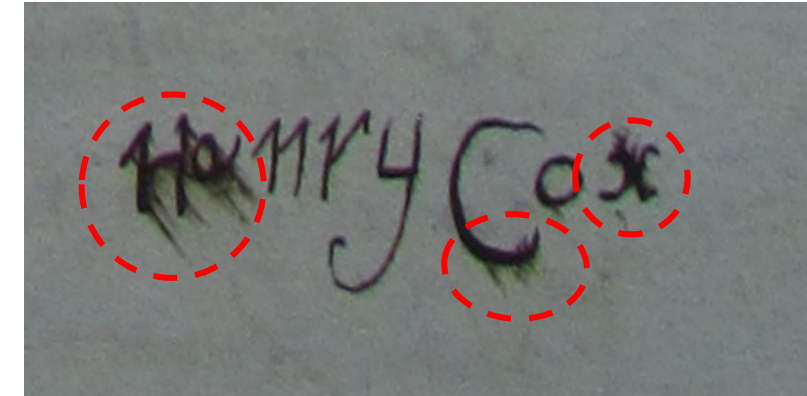

There is a better way...

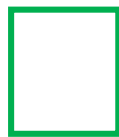

Feature extraction: blots, smudges, stylistic features, & deletions

Source: Clockwise from top LH side:
KaggleTestSnippet_HCA_1370_f.387v.PNG,
KaggleTestSnippet_HCA_1370_f.13r.PNG,
KaggleTestSnippet_HCA_1370_f.167r.PNG,
KaggleTestSnippet_HCA_1371_f.456r.PNG,
KaggleTestSnippet_HCA_1370_f.15r.PNG,
KaggleTestSnippet_HCA_1370_f.19r.PNG,
KaggleTestSnippet_HCA_1370_f.41v.PNG,
KaggleTestSnippet_HCA_1370_f.17v.PNG

Ink blots or smudges

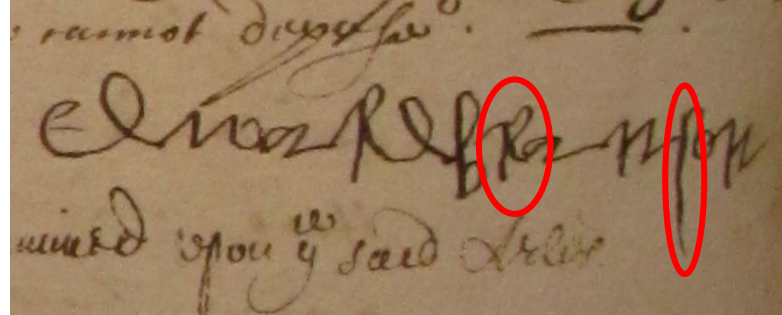

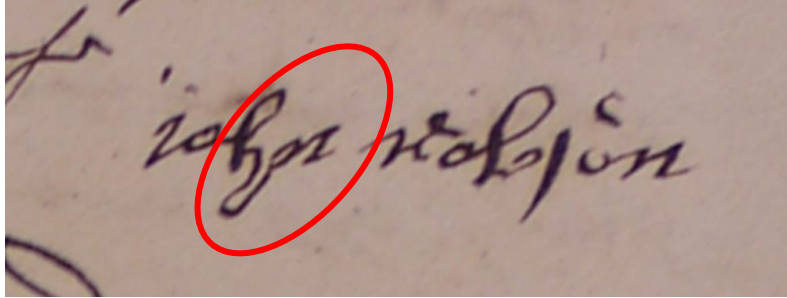

Stylistic feature or smudge?

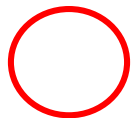

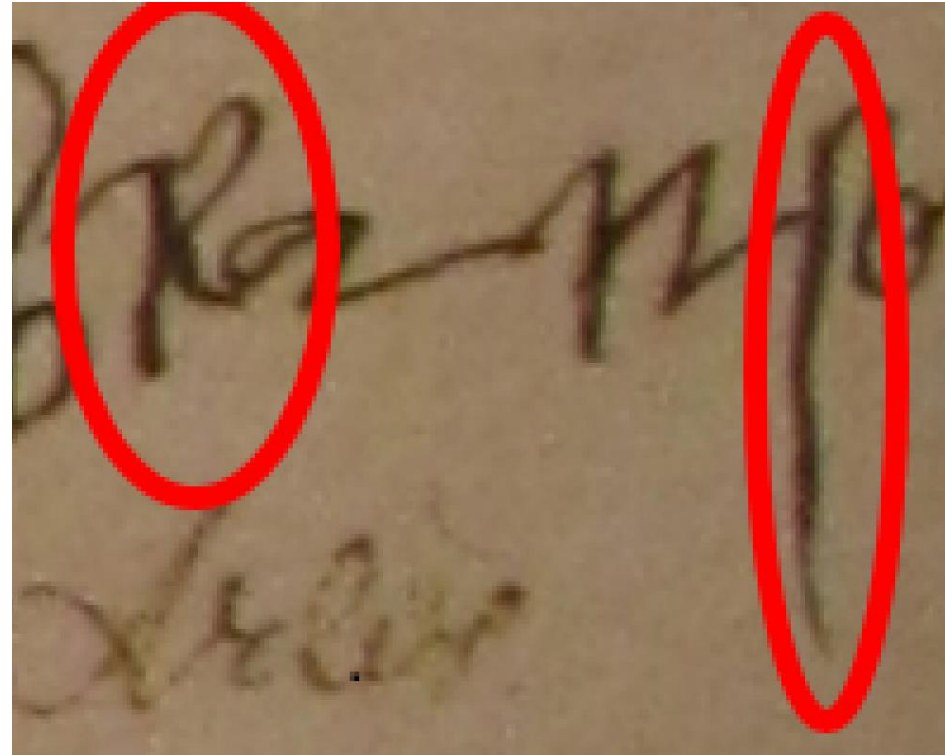

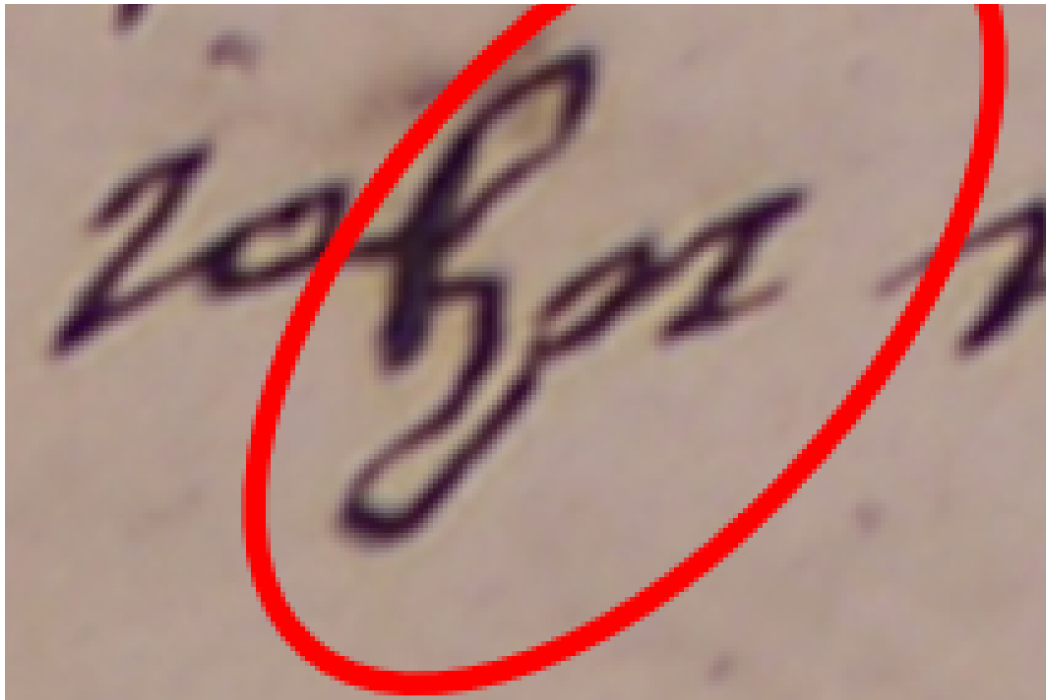

Deletion

Feature extraction: Detection of “shake” in straight and curved lines

HYPOTHESIS: Shaky lines may be a sign of poor signature execution (and by inference, poor handwriting execution) suggesting either lower level of literacy than smooth executed lines, or the effect of illness or age

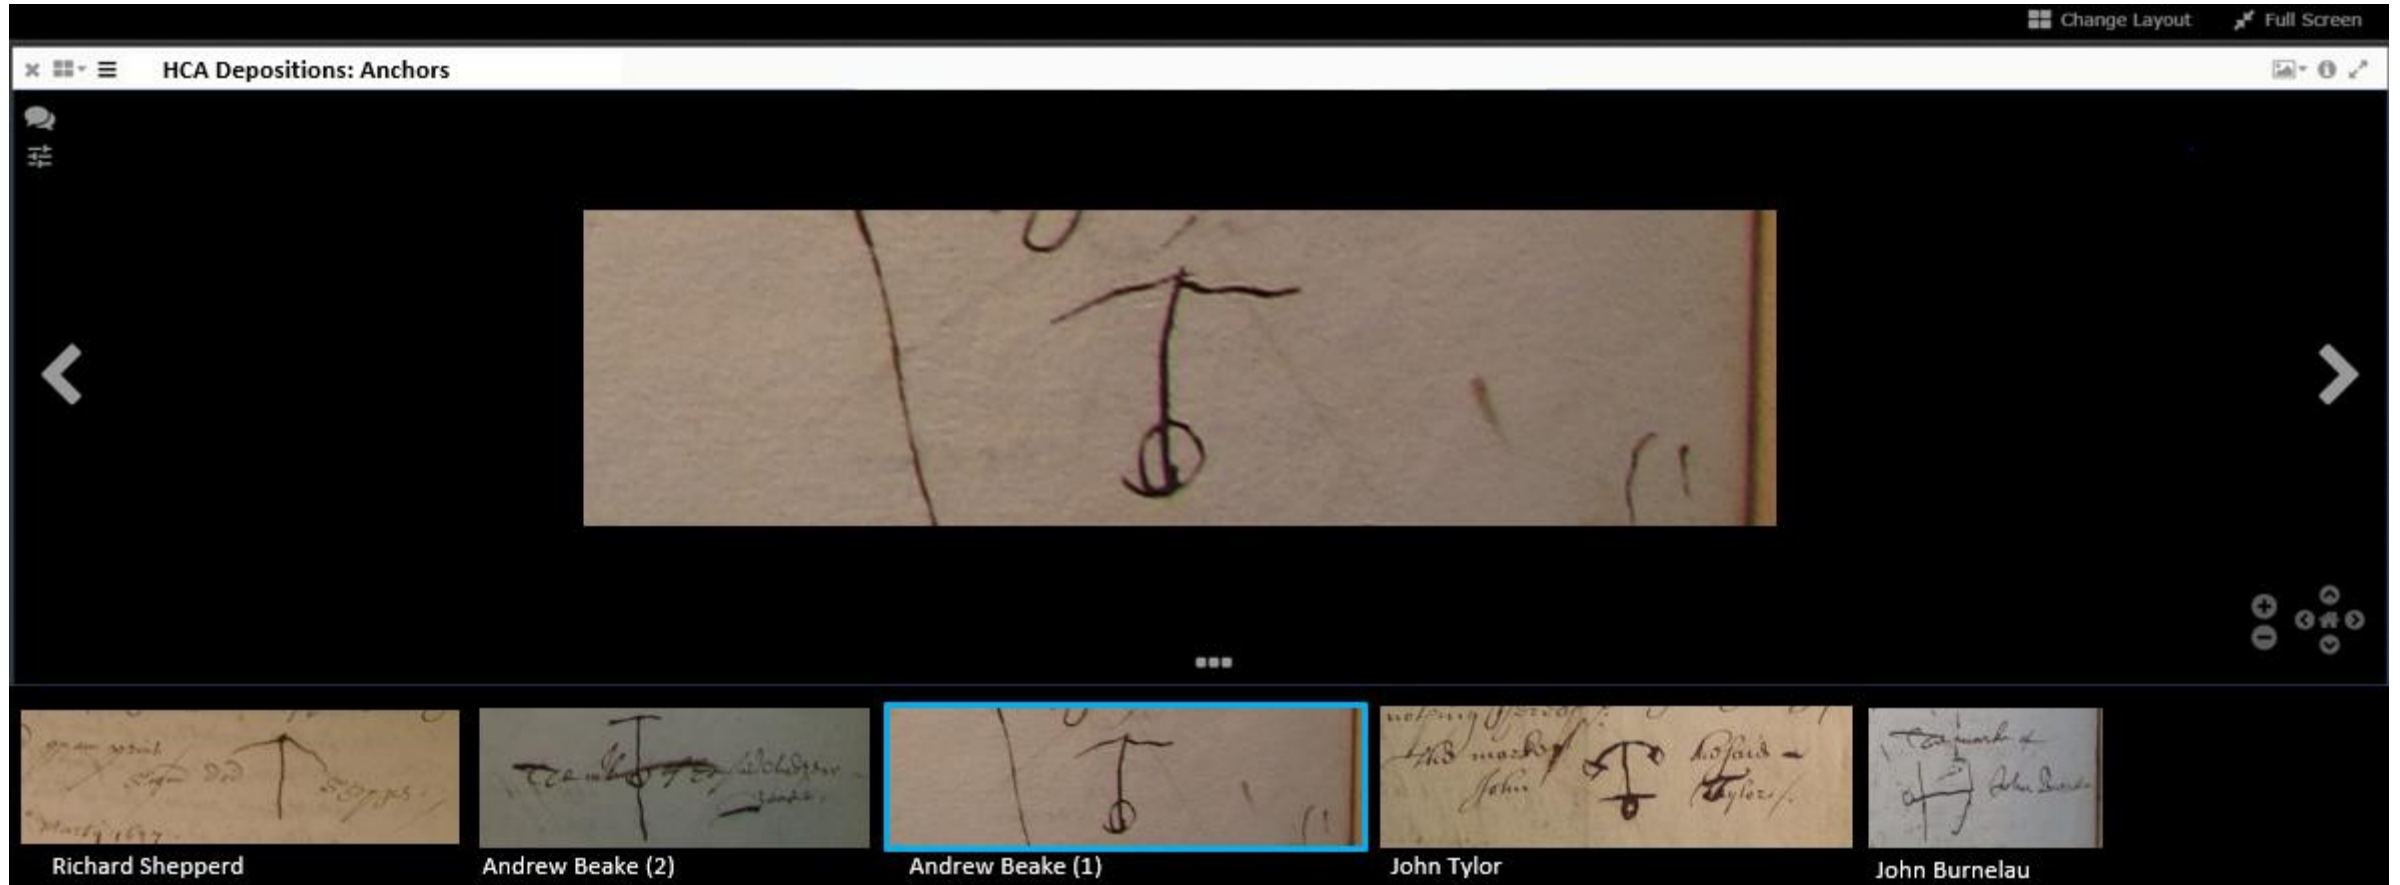

Shaky straight lines and/or loops

Clockwise, from top LH: KaggleTestSnippet_HCA_1371_f.435v.PNG,
KaggleTestSnippet_HCA_1368_f.483v.PNG,

Close reading using IIIF anchors manifest in Mirador viewer

Anchors

Mockup of a IIIF manifest in Mirador viewer, using <http://projectmirador.org/demo/> ;
http://www.marinelives.org/wiki/HCA_13/70_f.252v_Annotate

Planned use of AI

- Scale of targeted Signs of Literacy data set is 1 million manuscript pages vs. current 12,000 MarineLives manuscript pages
- Designed from get go as an exercise in collaborative intelligence, with strong focus on machine-human interface, expecting the role of machine and human to change over time
- Volunteers will be recruited explicitly for their interest in working with machines, rather than for their interests in palaeography and/or history
- Explicit measurement of user satisfaction & productivity as we introduce new tools to support volunteers in their process steps and/or automate specific process steps, allowing volunteers to concentrate on other parts of the overall metadata creation and linkage process

Our interest in Transkribus tools

- Text area identification
- Lineation and interlineation
- Key word spotting
- [HTR]
- [Upload of phone images with hand input document metadata to a IIIF database]

Folio 4 recto in volume HCA 13/124 of personal answers has a signature as a “signoff”

The image shows a handwritten document on aged, yellowed paper. The main text is written in a cursive script and reads: "To the laste position he answered and boldeneth what he hath formerly boldeneth ~~and~~ and denyeth what he hath formerly denied." Below this text is a large, stylized signature that appears to read "Wm Ashwell". To the right of the signature, the words "die prode" are written in a smaller, simpler script. In the bottom left corner, there is a small, partially legible signature that looks like "roza doro" followed by a slash. At the bottom center, the words "Responsa personalia Willm" are written in a large, elegant cursive script.

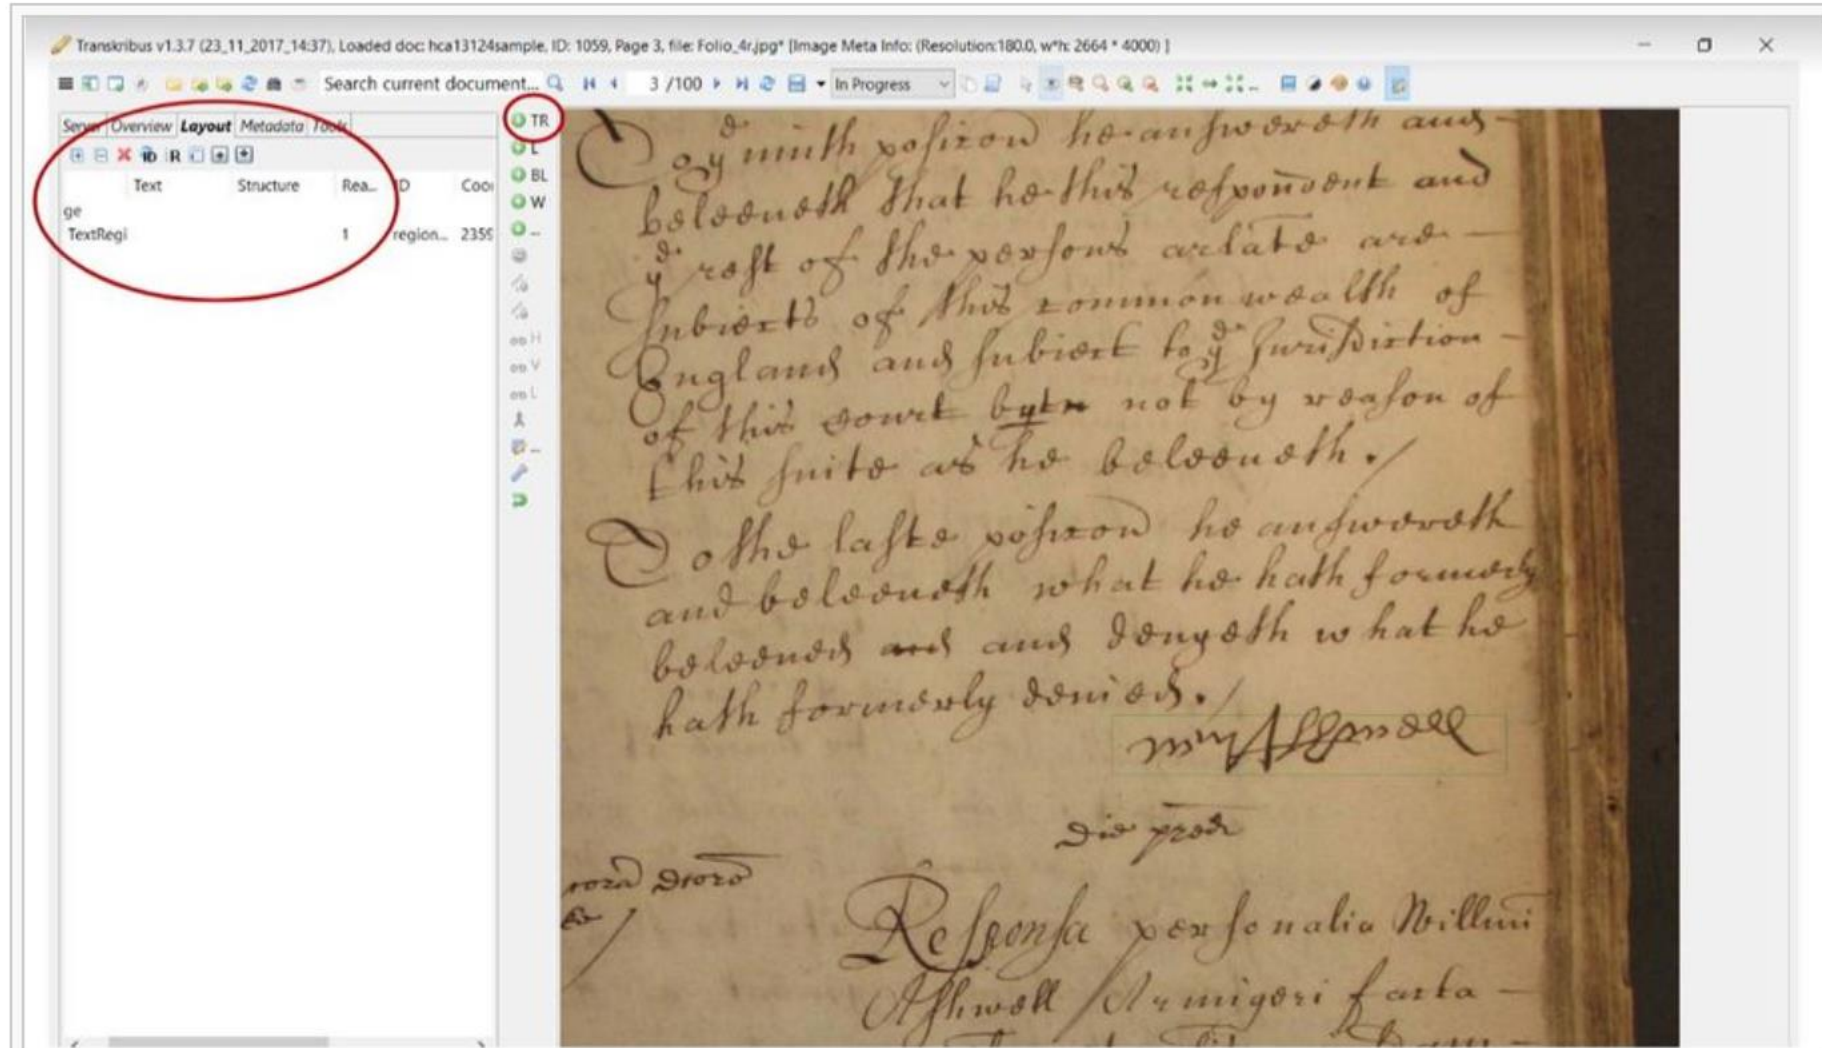

Signature of 'Wm Ashwell' (William Ashwell), who gave personal answer in the High Court of Admiralty, Nov. 1650, ([HCA 13/124 f.4r](#)) 

This folio is located within Transkribus document ID 1059, labelled as page 3 (out of 100)

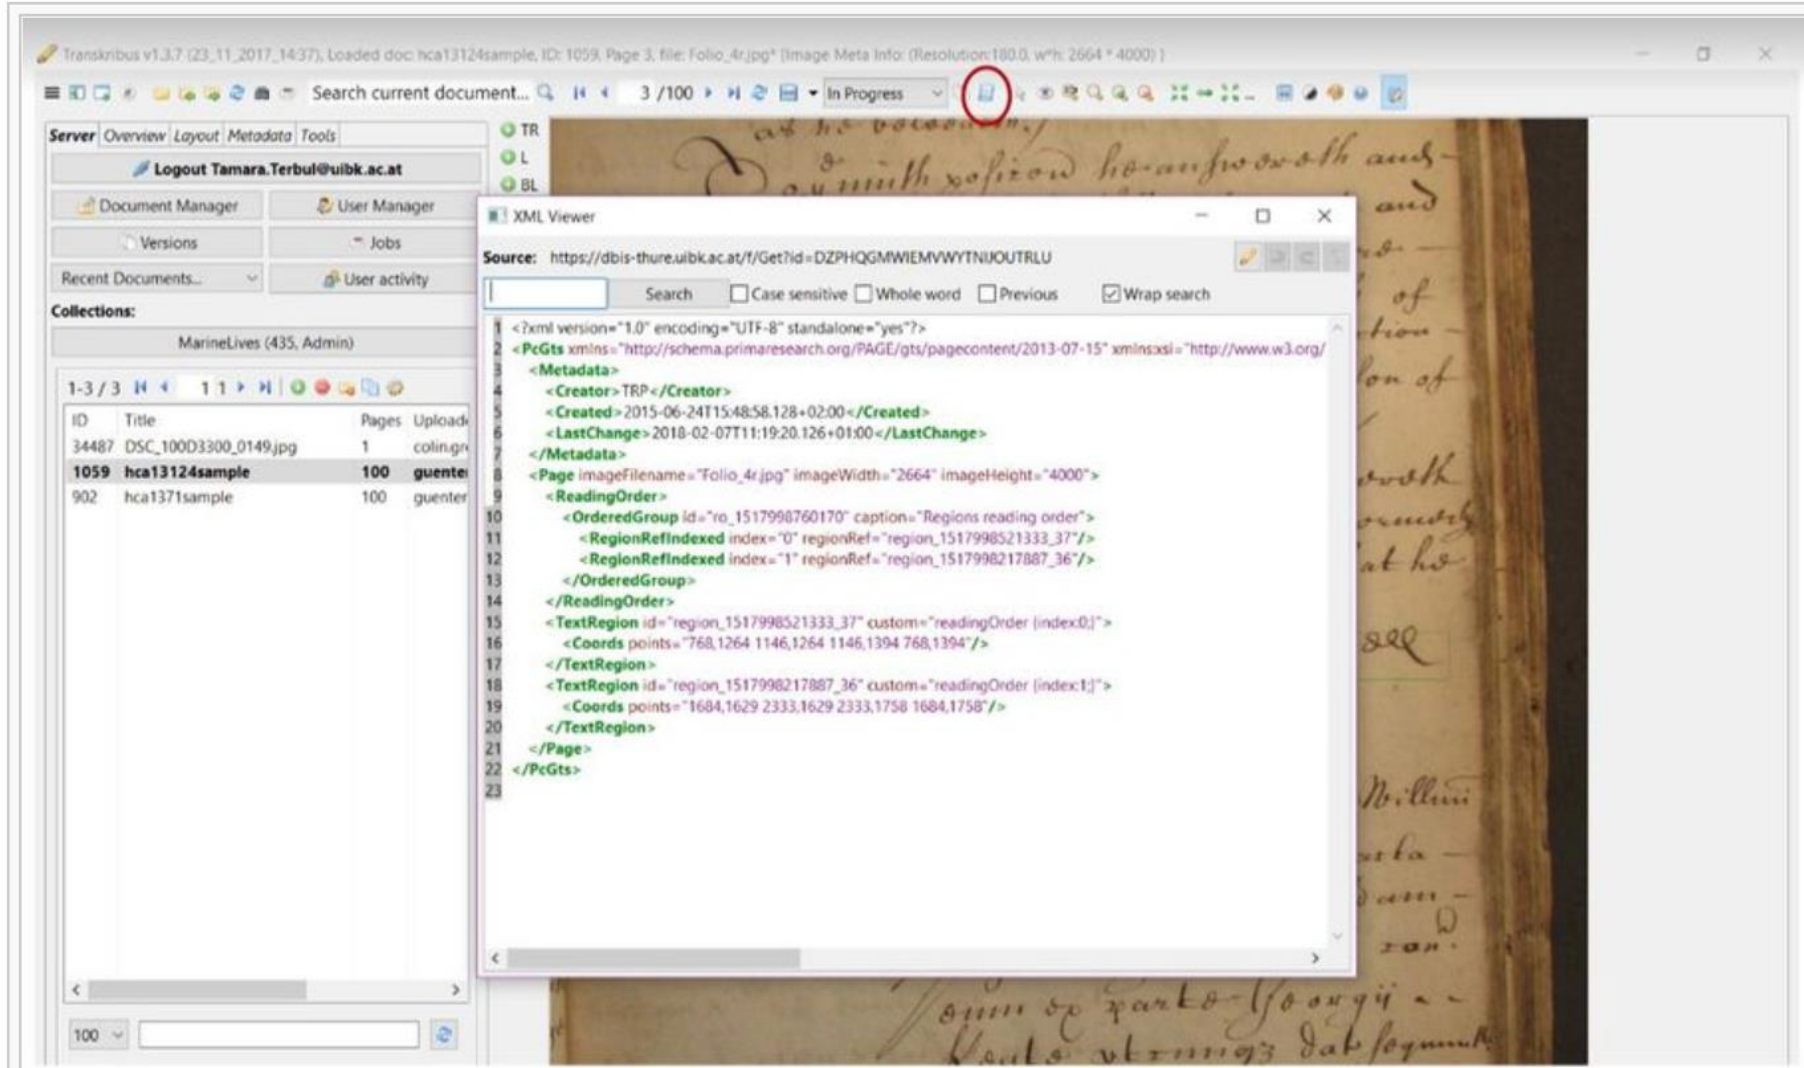

HCA 13/124 f.4r is located within a Transkribus Document ID 1059, and has been labelled page 3 by Transkribus out of 100 pages in this Transkribus document

Hand or automatic identification and labelling of signoff with a boundary box

MarineLives will hand identify one or more signatures and/or marks on a page with one or more rectangular 'Text Region' boxes

XML data on location of signoff

The screenshot shows the Transkribus v1.3.7 interface. The main window displays a document page with handwritten text. A red circle highlights the 'XML' icon in the top toolbar. An 'XML Viewer' window is open, showing the XML data for the selected page. The XML data includes metadata and page information, such as the creator, creation date, and page coordinates.

XML data for each page containing a signature or marke can be inspected and processed by researchers, and linked (if desired) to metadata on name, place of residence, occupation, age, and date of deposition, through the Excel spreadsheet described above

Some early results

Analysis of signatures by groups of 10 signoffs organised by occupational type to assess consistency of data and effect of sample size in
SOLM-2018 data set
Data as of 27/08/2018 & 29/08/2018, n = 760

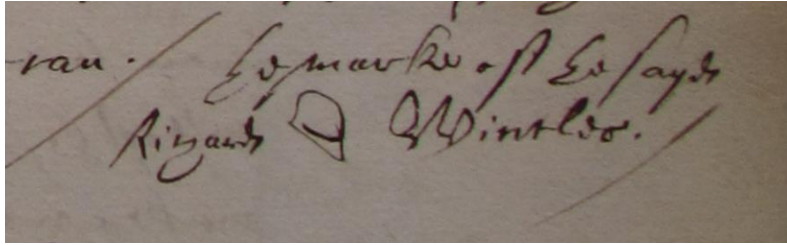

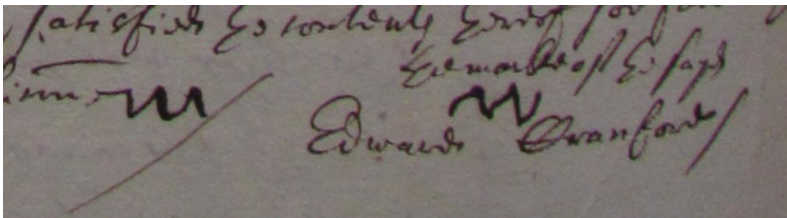

Some early results

Porters handling coals, whale oil, ginger & corn

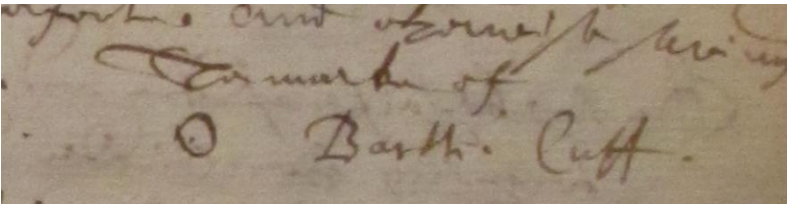

Richard Wincles, thirty-three year old porter, of the parish of Stepney, Middlesex, Dec. 15, 1656; employed as a labourer with fifteen other men to unload coals from the *Imployment* moored near Execution Dock, Wapping, into lighters for fixed rate of 12 s per man ([HCA 13/70 f.554r](#))

A handwritten signature in brown ink on aged paper. The text reads "Richard Wincles." with a large, stylized initial "R" and "W".

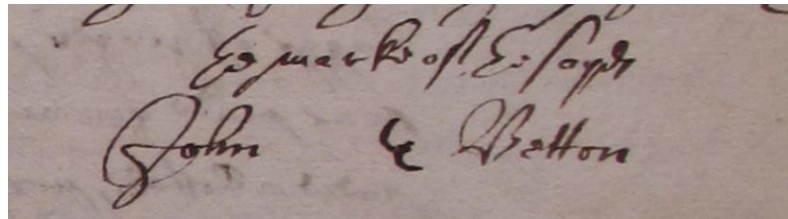

Edward Cranford, forty-four year old coale heaver or porter, of the parish of Stepney, Middlesex, Dec. 15, 1656; employed as a labourer with fifteen other men to unload coals from the *Imployment* moored near Execution Dock, Wapping, into lighters for fixed rate of 12 s per man ([HCA 13/70 f.555v](#))

A handwritten signature in brown ink on aged paper. The text reads "Edward Cranford" with a large, stylized initial "E" and "C".

Bartholomew Cuff, sixty year old porter of the Stillyard, of the parish of Allhallowes the Greate, London, May 15, 1658; assisted in the landing of whale oil from lighters at the Stillyard Key and loading them away into a warehouse ([HCA 13/70 f.555v](#))

A handwritten signature in brown ink on aged paper. The text reads "Bartholomew Cuff" with a large, stylized initial "B" and "C".

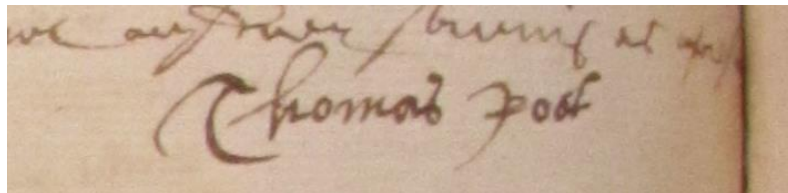

John Betton, fifty-four year old citizen and white baker of London, of the parish of Saint Buttolph Algate, London, Jul. 31, 1655; self-described as a porter employed by the Commissioners for Prize Goods to deliver ginger from a warehouse at Ralphes Key ([HCA 13/70 f.449r](#))

A handwritten signature in brown ink on aged paper. The text reads "John Betton" with a large, stylized initial "J" and "B".

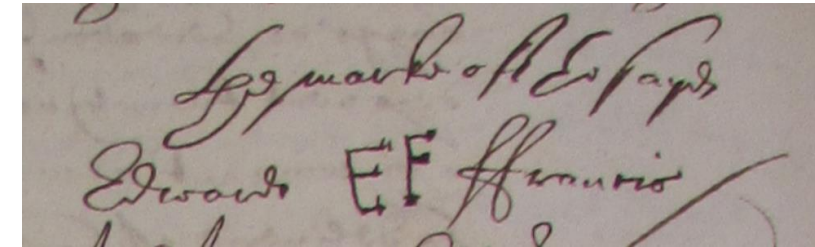

Edward Sherwin, fifty-six year old cittizen and leatherseller, of the parish of Little Allhallowes, London, Jul. 31, 1655; self-described as a porter employed by the Commissioners for Prize Goods to deliver ginger from a warehouse at Ralphes Key ([HCA 13/70 f.449v](#))

A handwritten signature in brown ink on aged paper. The text reads "Edward Sherwin" with a large, stylized initial "E" and "S".

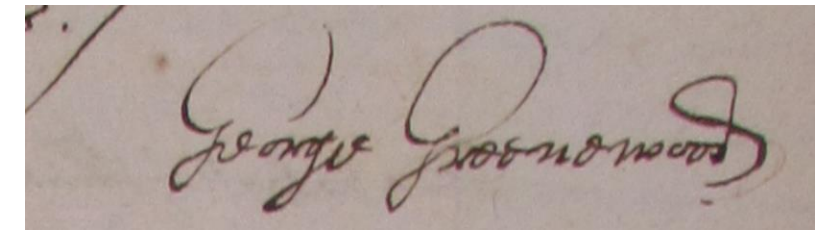

Thomas Roots, twenty-nine year old porter, of the parish of Greate Allhallowes, London, May 15, 1658; assisted in the landing of whale oil from lighters at the Stillyard Key, as one of the Stillyard porters, and loading them away into a warehouse ([HCA 13/72 f.330v](#))

A handwritten signature in brown ink on aged paper. The text reads "Thomas Roots" with a large, stylized initial "T" and "R".

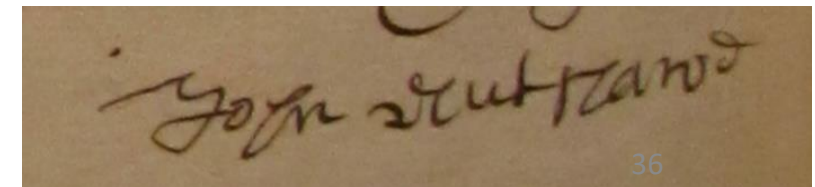

Edward ffrancis, citizen and merchant taylor of London, of the parish of Saint Olave in Southwarke, Jul. 31, 1655; self-described as a porter employed by the Commissioners for Prize Goods to deliver ginger from a warehouse at Ralphes Key ([HCA 13/70 f.450v](#))

A handwritten signature in brown ink on aged paper. The text reads "Edward Francis" with a large, stylized initial "E" and "F".

George Greenwood, thirty year old citizen and vintner of London, of the parish of Saint Buttolph Bishopsgate, London, Jul. 31, 1655; self-described as a porter employed by the Commissioners for Prize Goods to deliver ginger from a warehouse at Ralphes Key ([HCA 13/70 f.454r](#))

A handwritten signature in brown ink on aged paper. The text reads "George Greenwood" with a large, stylized initial "G" and "G".

John Nutshall, fifty-five year old corne porter, of the parish of Saint Saviours Southwarke, Nov. 19, 1653; employed with a barber chyrurgeon/corne meter, an additional corne-meter, and other labourers to unlade a cargo of what in the *ffortune* of Stettin, moored against Limehouse; eight years of experience as a corne porter ([HCA 13/70 f.352v](#))

A handwritten signature in brown ink on aged paper. The text reads "John Nutshall" with a large, stylized initial "J" and "N".

We need visual metadata, which can be machine processed
